

## **LMAX Group integrates Deltix to expand institutional access to perpetual futures**

**London, 29 September 2026** – LMAX Group (“LMAX”), the leading global cross-asset marketplace for FX and digital assets, today announced its integration with Deltix, part of EPAM Systems, to enable institutional clients to access and trade perpetual futures.

The integration supports the development of institutional-grade connectivity and trading infrastructure and enhances access to LMAX perpetual futures offering through a scalable and high-performance framework designed to meet the needs of sophisticated trading firms.

The collaboration reflects a shared commitment to deliver solutions that support institutional participation in the evolving digital asset derivatives market. The integration has been developed in collaboration with EPAM and its Deltix technology team, with Geneva Trading onboard validating the connectivity and integration.

**Jenna Wright, Managing Director, Digital Assets at LMAX Group, said:** “Working with Deltix (EPAM) further strengthens how institutional clients access our growing suite of products, including perpetual futures. This integration enhances connectivity, supports efficient execution and reinforces the resilience and performance standards our clients expect. It reflects a shared focus on delivering high-quality trading environments for sophisticated market participants.”

**Brandon McCoy, Account Manager, Deltix, said:** “The availability of LMAX’s perpetual futures venue through our MarketMaker and CryptoCortex platforms builds on a long-standing integration, with over six years of connectivity across LMAX FX and spot crypto venues. Extending this to perps enables institutional clients to access deep liquidity with low-latency execution and the risk management capabilities they require, with institutional firms already validating the connectivity within a professional trading environment.”

### **About LMAX Group:**

LMAX Group is the leading global cross-asset marketplace, powering the fusion of traditional and digital finance through trusted technology. Operating multiple

institutional execution venues and providing access to custody and market data services for FX and digital assets, LMAX connects the world's largest and newest asset classes via seamless, transparent and regulated infrastructure. The Group's portfolio includes LMAX Exchange (institutional FX exchange, FCA regulated MTF and MAS regulated RMO), LMAX Global (FCA and CySec regulated brokers) and LMAX Digital (GFSC regulated execution venue and custodian).

Serving funds, banks, asset managers, retail brokerages and buy-side institutions in over 100 countries, LMAX designs, builds and operates its own high-performance, ultra-low latency exchange technology with matching engines in London, New York, Tokyo and Singapore. Combining deep expertise in FX with digital asset innovation, LMAX provides the trusted foundation on which the next generation of global markets will operate.

### **About EPAM**

Deltix provides industrial-grade solutions for the global digital and trad-fi markets, addressing the most complex and demanding challenges faced by buy-side and sell-side trading firms. At the heart of Deltix's offerings lies a cutting-edge technological platform capable of streaming and analyzing vast volumes of time series data with high throughput/ultra-low latency, enabling clients to trade at exceptional speed with precision and scalability.

With more than 1,000 man-years invested in its platform, Deltix has developed an open ecosystem with robust APIs in Java, C#, Python, and C++. This supports quantitative research and alpha generation, systematic and discretionary trading, connectivity to global markets, and more. Trusted by leading institutions, Deltix empowers its clients to operate faster and more efficiently in today's complex trading environment.
